

Absa Family

Invest Together. Spend Together. Grow Together.

The Insight

Financial education starts at home.
Parents invest in their children.
Children learn from their parents.
And Absa invests in the future of both.

The Solution

Invest in your future. Invest in theirs.

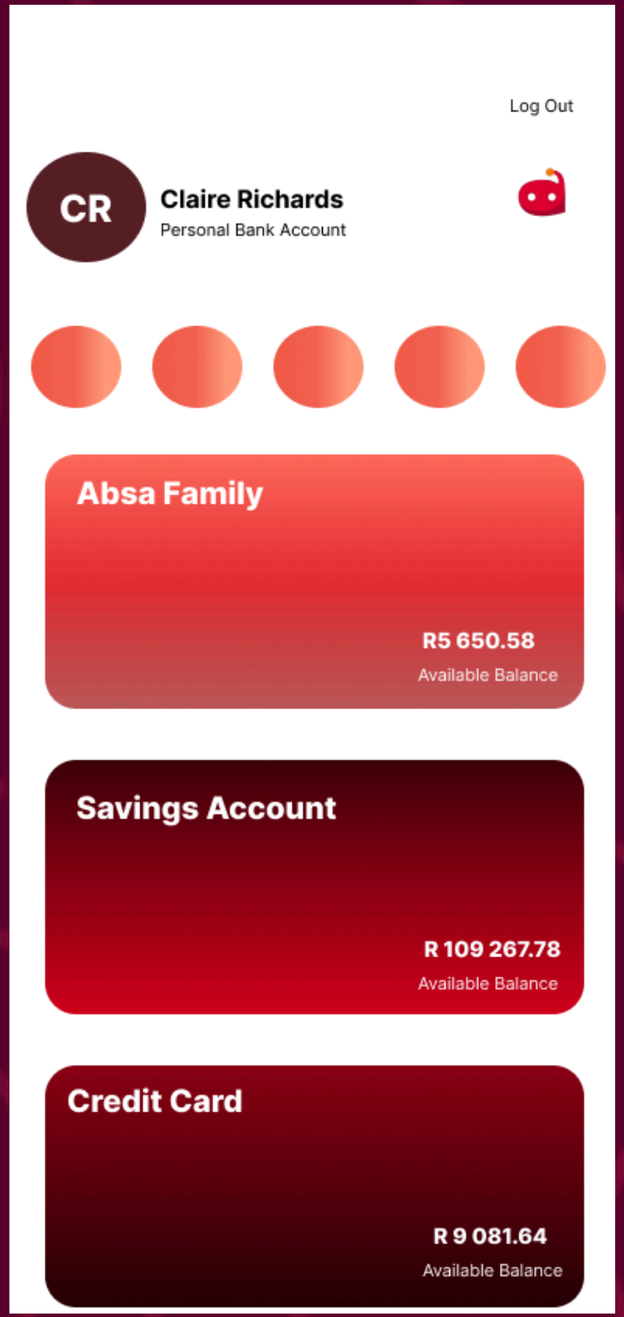

A family investment experience built into the Absa app, where parents and children learn, save and invest together.
Parents create an Absa Family profile linked to their children's accounts, giving the whole family a shared space to:
INVEST TOGETHER

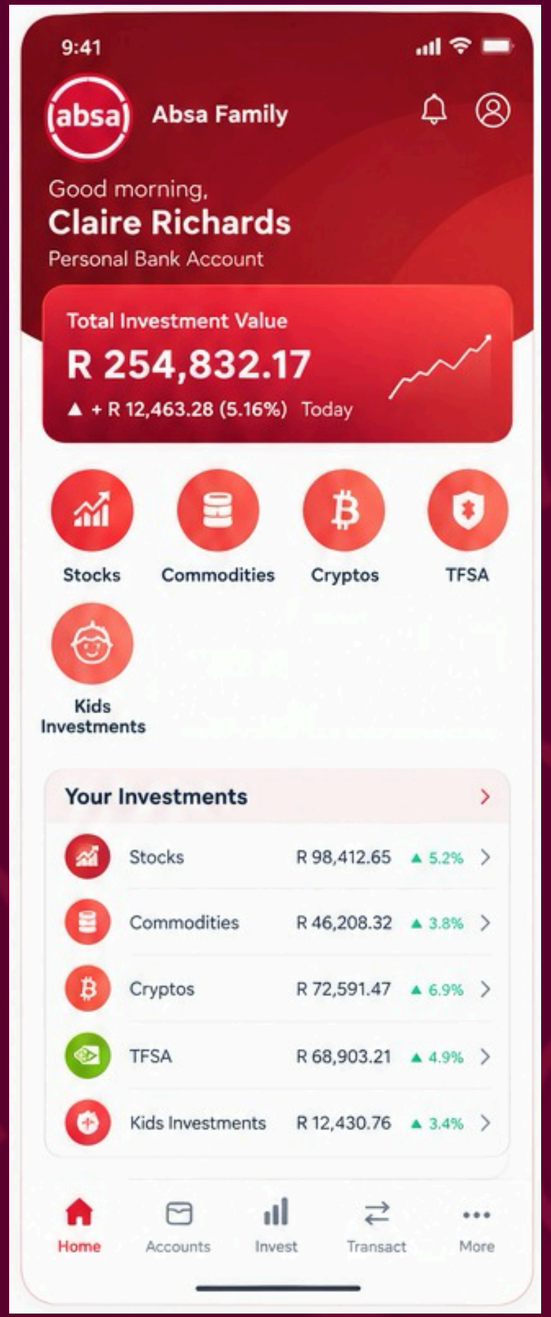

Parents can build family investments across stocks, crypto, commodities and TFSAs, while children can start with their own small savings and investment goals.
LEARN BY DOING

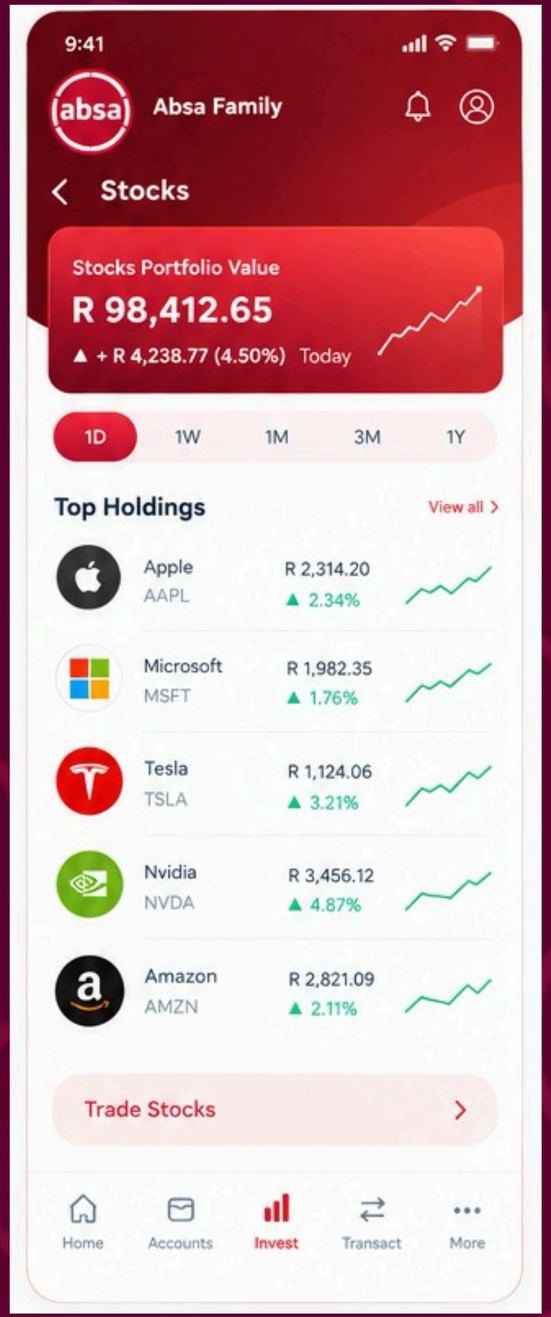

Children can explore safe investment simulations, see how investments grow and learn financial concepts through real-world family activity.
BUILD THEIR FUTURE

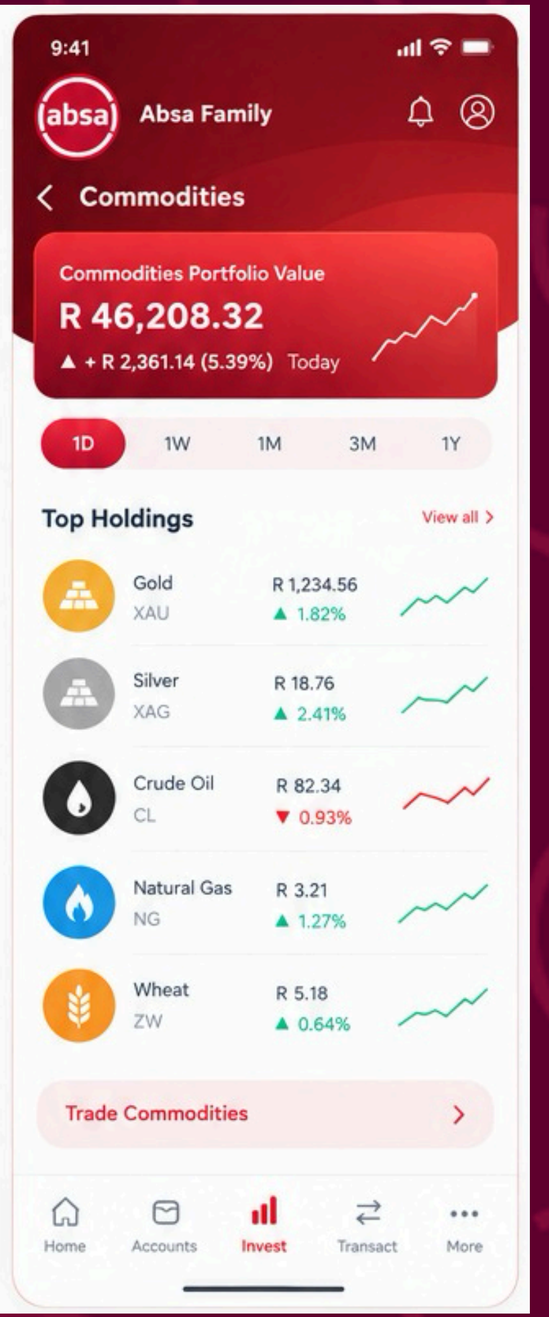

Why Absa Wins

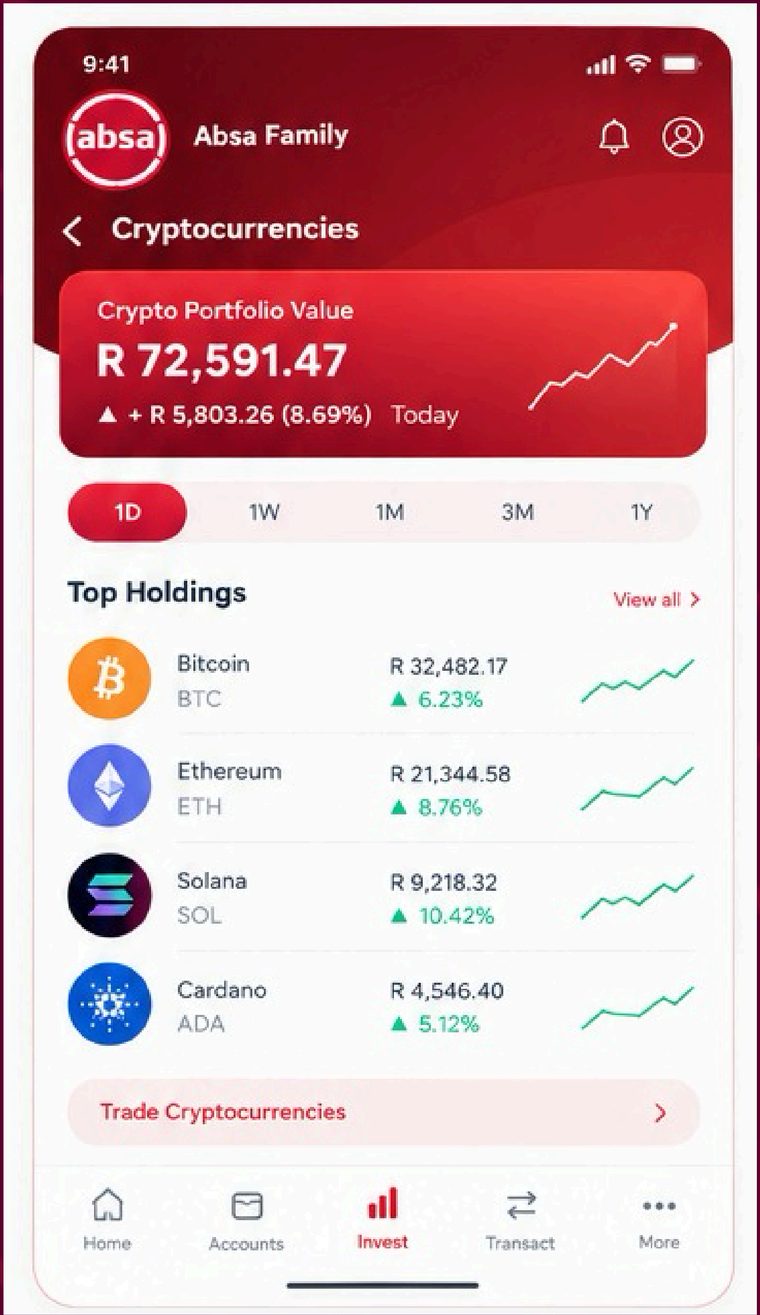

- Absa Family turns individual customers into household relationships.
- Parents invest.
- Children participate and learn.
- Investments grow over time.
- As children grow, their relationship with Absa grows with them.
- Absa does not only retain an account. It retains the financial relationship across generations.
